RE: CAA File # 169 - Audiology

Dear President Kozloff:

I am happy to inform you that your clinical doctoral program in audiology has been granted accreditation by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. This accreditation is for an eight-year period beginning October 1, 2004 through September 30, 2012.

Annual reports will be reviewed by the Council to assure that your program maintains compliance with the minimum requirements for accredited programs and will be due October 1st for the next six consecutive years. On the seventh anniversary of your accreditation period, you will be asked to submit an application for reaccreditation to allow the Council on Academic Accreditation a year to complete its processing before your accreditation expires.

The name of your university will appear on all published list of accredited programs during your accreditation period, including the Online Guide to Graduate Education in Speech-Language Pathology and Audiology, as well as periodic lists published separately and sent on request to many individuals each year.

May I offer my congratulations on your achieving this national distinction.

Sincerely,

Michael J. Moran, PhD, Chair
Council on Academic Accreditation
