Business Intelligence 7.0 (BI) Reports

The SAP BI budget and award reports are run from the database known as the Business Warehouse (BW). It is important to note that BI is refreshed once daily each morning. The update is generally completed by 8 am. This means that the reports will include no transactions from the day the report is physically processed.

In order to assist with your financial reporting needs, most users have been set up with their own unique personalization. The intent of the personalization is that a user will not need to enter any variables when processing reports. However, if a user wishes to select a different variable they can still do that.

The BI reporting tool offers a number of added benefits for our users:

1. There are no longer numerous User IDs and passwords to remember – BI reports are accessed using the Employee Self Service (ESS) portal. Because of the integrated sign-on, the only user ID and password necessary is your Bloomsburg Domain logon and password.

2. BI reports are tabular in nature so most of your financial data can be retrieved by running one single report.

3. BI offers users the ability to “jump” (drilldown) into SAP for the detail for the financial data being viewed.
BI Logon

Users will logon to BI through Employee Self Service (ESS) in the same manner as they do currently to access their pay statements and enter leave requests.

1. Go to the ESS portal. You may already have this saved in your Favorites. If not, you can go to the Human Resources and Labor Relations website @ http://bloomu.edu/node/837 and select “Employee Self Service” on the left pane.

2. Select “Log Into ESS” on the right side under Quick Links.

3. Enter your University domain user ID (FirstInitialLastName@bloomu.edu) and password and click “Enter Portal”

4. You will now see a Business Intelligence tab as one of your options. Click on the tab

If the Business Intelligence tab is not displayed, please contact the Grant Accounting office @ x4022
On the Business Intelligence tab, each User will have two sub-tabs – Campus Reports and Manage Saved Views.

The Campus Reports will contain the Reports which are available campus wide.

The Manage Saved Views tab will be used for two purposes. It will enable a user to directly access a personal view they have created. These views will appear in the “Favorites” folder. The procedure for creating personal views is explained on Page..... This tab will also be used to access custom views created for you by the Grant Accounting office.

Now that you are familiar with the BI Reporting Portal, let’s open a report and get familiar with Navigating a BI report!

To open the Award Report, simply click on it!
Entering Variables

Variable Entry Screen

After clicking on the Award Report link, a Variable Entry screen will appear.

Most users have already been set up with their own unique personalization based on the funds centers they are responsible for. If your personalization is up-to-date and accurate, you will not need to change any of these values. Simply click the OK button to execute your report.

After clicking OK, a turning wheel will indicate the report is running.

If you are not seeing any variables listed, you can enter the variables yourself. Some variables can be typed in directly. Others must be selected by using the Selection Button - reference the screen shot to the right. When typing directly into the field it is recommended that you click on the Check Button to verify the values you entered are valid. You can enter more than one item by separating them with a semi-colon. For example, if you are entering data in the funds center field:
1011030201;1011030202

Entering values with the Selection Button

1. Click on the Selection button to open a dialog box for the variable value options.
2. Select the value from the list by clicking on the block to the left of the value. In this example, multiple values can be selected.
3. Click the Add button to add the values to the list.
4. After clicking add, notice the Selection values are added to the right.
5. Click OK when all the selection values are added.

If you want your variables to be saved (personalized) or if there are additions/changes that need to be made, please contact the Grant Accounting office at x4022.
### Data Update

**Query Description and Last Update**

A. For each tab selected, the description of the query will display.

B. The Last Data Update date and time will also display. This is the day and time the SAP BI reports were last updated with SAP data. Keep this date and time in mind when viewing BI reports. **BI is a reporting platform and does not contain real-time data.** Typically, your reports contain all the prior day information by 6:30 AM each morning.

![Data Update Example](image)

---

### Tab Layout

**Tab Layout**

BI reports are tabular in nature. The tabs have been created to categorize data for financial managers and enable them to meet their reporting needs. To navigate from tab to tab, click on the appropriate tabs. Please note that a user should click one-time only. BI will display a processing wheel until processing is complete. The active tab will be darker than the others.

Tabs are arranged in a logical order. Summary or high level data is first, followed by more detailed or specific Tabs. Specialty tabs (i.e. Payments, and Dashboard) can be found at the end. The Summary tab is the most commonly viewed report. More information on this, as well as the Specialty tabs, can be found in the sections that follow. Features described on the Summary tab section (i.e. drop down boxes, arrows, etc.) are also available on most other tabs.

![Tab Layout Example](image)
Summary Tab

The Summary tab shows the budget status and is the most commonly viewed report.

A. Users can click on any of the dropdown boxes to select data.
B. It is important to note that if multiple funds or funds centers were included on the variable selection, that the data rolls into one total. The user will need to select each individual fund or funds center from the drop down box in order to view the data separately.
C. The most commonly viewed Commitment Item Category is “Total Expenses” which shows the personnel budget, operating budget and operating reserves (CI 6xx, 7xx, 82x, and 90x). This is the default but can be changed by selecting from other categories in the drop down box such as “Personnel” and “Non-Personnel”.

![Summary Tab Image]
D. Anytime there is an arrow displayed, this means the category can be expanded to display additional information.

By expanding “Current Budget”, you can view the budget source. To collapse the data, click on the arrow again.

By expanding “Commitments”, you can view funds reservation, purchase requisition, and purchase order data. You can drill down into each category to view additional details.

By expanding “Actuals”, you can view categories shown below.

---

**Budget Tab**

The Budget Tab displays all budget entries: Enter (Original Budget), Carry Forwards, Transfers, Supplements, and Returns. All of these items make up your “Current Budget”. 
**Commitments Tab**

The Commitments Tab displays all open commitments. The following detail is displayed:

<table>
<thead>
<tr>
<th>Commitment Item</th>
<th>Vendor</th>
<th>Prev. Doc #</th>
<th>Doc #</th>
<th>Item</th>
<th>Text</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not Complete</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
- Original & Carryforward
- Reductions & Adjustments
- Balance (Open Commitments)
- Remaining %

**Example:**

<table>
<thead>
<tr>
<th>Item</th>
<th>Vendor</th>
<th>Prev. Doc #</th>
<th>Doc #</th>
<th>Date</th>
<th>Commit</th>
<th>Pay</th>
<th>ID</th>
<th>Doc Text</th>
<th>Balance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1019779</td>
<td>BORAN SALES &amp; SERVICE</td>
<td>400031125</td>
<td></td>
<td>07/19/2011</td>
<td>701.56</td>
<td>226.45</td>
<td>475.13</td>
<td></td>
<td>68.9</td>
</tr>
<tr>
<td>1</td>
<td>MAINT CONT/D20101763146</td>
<td></td>
<td></td>
<td>07/19/2011</td>
<td>525.56</td>
<td>-164.99</td>
<td>360.57</td>
<td></td>
<td>64.8</td>
</tr>
<tr>
<td>2</td>
<td>MAINT CONT/D20101763149</td>
<td></td>
<td></td>
<td>07/19/2011</td>
<td>609.38</td>
<td>-455.41</td>
<td>343.48</td>
<td></td>
<td>34.8</td>
</tr>
</tbody>
</table>

**Actuals Tab**

The Actuals Tab displays all actuals or paid items. The Fund and Funds Center are shown. The additional items are also displayed: Commitment, Posting Date, Doc #’s, Doc Text, Vendor, and Actuals.

**Click on the arrow before Actuals, report will run and then show payment type.**

*Non-Personnel & Exp. Chargebacks*  
Actuals
The payments tab will display all paid invoices to vendors where the expense was posted to the funds center.

A. A dropdown is available for Vendor
B. A dropdown filter is available for document #. This will allow the user to quickly filter to a single document if the document number is known.
C. The View Payee button will show the Payee of the check. The Payee and the vendor do not always match.
D. View Line Item Text button will show the text that was printed on the check.
E. Outstanding Checks button will filter for all records where there is a check number but the check has not been cleared.
F. Posting Date is when the expense was entered in SAP and posted as an expense.
G. Payment Method will show if the invoice was paid by Check or ACH transfer. If # is in the column, this means the expense was posted but the invoice was not paid yet.
H. Payment Date is the date the check was printed or the ACH transfer was executed.
I. Check # displays the check number. There will be no check number for ACH transactions.
J. Check Cleared will display the date the check cleared the bank.
K. Invoice Amount is the total invoice. This amount may not match the expense posted to your funds center(s). The expenses on an invoice be shared by multiple funds centers.

To view the Funds Center(s) where the expense was posted, simply execute the Goto command by right clicking on the line for which you want to drill down. Then select Actuals Detail Lines. A new window will open to show all the Funds Center(s) where the expense was posted.
The Dashboard tab provides a dashboard report based on variables selected on the summary tab.

A. The percent of the current fiscal year is displayed based on remaining pays.
B. Dropdown boxes allow filtering on Fund and Funds Center.
C. The most recent posting date of non-personnel expenses scroll by expense dollars in descending order.
D. The bar graph displays actual expenses in green and commitments in yellow in descending order.
E. The speedometer graphs display the dollars and percent of budget remaining. The dotted blue line represents the % of the fiscal year passed. If the solid line passes the dotted line, expenses and commitments are exceeding the rate of time.
F. Displays operating expense and chargebacks by month. Commitments are not included in this graph
G. Displays current/prior YTD variances by Commitment item group
A. OPEN - Access and open any previously saved used-defined views.
B. SAVE - Save a user-defined View after implementing formatting and criteria changes.
C. UNDO - Undo last navigation change. Each click will back out another step / change. Allow time for each screen refresh. NOTE: THIS ACTION MAY TAKE SEVERAL MINUTES. Vartan Way (Sytec) IS CURRENTLY WORKING ON A SOLUTION.
D. RESET - This will undo all user navigation and filter changes and return the view to the way it was delivered. NOTE: THIS ACTION MAY TAKE SEVERAL MINUTES. VARTAN WAY (SYTEC) IS CURRENTLY WORKING ON A SOLUTION.
E. VARIABLE SCREEN - This will return the user to the Initial Variable Screen to change your selections.
F. DISPLAY - This will show all variable and filter selections that are currently in effect.
G. FILTER VALUES - Hide/Display Variable (report-wide) and Dynamic (tab only) Filter Values. The report defaults to display variable and filter values.
H. EXCEL - This will allow you to export the current view to Excel for further processing.
I. PDF PRINT - This will convert the current view to a PDF format to allow you to either print the view or save the PDF file.
J. PROPERTIES - This will display the properties of the current view. Toggle on / off.
L. NAVIGATION PANE - This will allow you full access to the building blocks of the current view. Toggle on / off.
M. FILTER PANe - This will allow you full access to apply / remove filters on the data. Toggle on / off.
N. EXCEPTIONS - Add or edit the formatting of cells based on report values - i.e. cells in red when dollar amount is negative.
O. CONDITIONS - Limit display of data that meets particular user-defined criteria.
P. FULL WINDOW VIEW - Open the report detail or chart in a full window to aid scrolling.
Q. DOCUMENTATION - Access the report documentation and/or tab specific notes.
Open Saved User-Defined Views

Click on the Open User Defined Views icon on the toolbar to open the views you had previously saved.

A. Make certain you are on the favorites tab. This is where all your user-defined views should be saved.

B. Click on the view you want to open.

C. You will notice after clicking on the view the name will appear. Verify you have the correct view selected. Ignore the technical name.

D. Click the OK button to open the view.

Save User-Defined Views

After making navigational or filter changes to a report, you may wish to save those changes for future reference. Saved Views can save considerable time. Click on the Save User-Defined Views to create a new user-defined view.

A. The Save Variable Values will be checked by default. Uncheck this box before saving.

B. On the Favorites tab...

C. You will notice all the views you have saved. You can click on one to overwrite it (with the same name) or double-click on a folder to save in a folder. Tip: Folders can be created on the Manage Saved Views tab of the portal.

D. Type the Description of your view.

E. After typing the Description, click OK to save the user-defined view.

Folders can be created to organize your “Favorite” views. Go to the Manage Saved Views tab under Business Intelligence on the portal.
NOTE: THIS ACTION MAY TAKE SEVERAL MINUTES. VARTAN WAY (SYTEC) ARE CURRENTLY WORKING ON A SOLUTION.

Click on the Back icon \( \text{Previous Button} \) to undo your last navigation or filter. Each time you click the Back button you will undo one step. You can click multiple times to undo multiple steps but you must wait for the screen to refresh after each click. DO NOT use your browser’s back button or your browser’s context menu back button.

Clicking the Back to Start \( \text{Back to Start Button} \) button will remove all navigation steps and return the report to the original navigational state. It will also remove any dynamic filters that we added since the report was executed.

Variables

Use the Variables Icon to quickly reprocess the report with new values.

A. Click on the Variables icon \( \text{Variables Icon} \) to call the variable screen to change variable values.
B. The variable dialog box will open.
C. Change the variable values.
D. Click OK

If you change the variable values after running the report with the Variables button, your current navigation state and dynamic filters are preserved when the new variable values are returned. If you simply run the report from the original link again, your navigational state is lost.
The Display button will show toolbar icon legend, all variable and filter selections, query filters, general information, and any query documents.

1. Click on **Display** button on toolbar
2. **Icon Legend** will explain the use for each toolbar button
3. Variables and Filters will display all variable values, including blank variable values, as well as dynamic filters on the active tab.
4. **Static Filters/Query Filters** will display variable values as well as filter values that are in the query design.
5. **General Query information** will display who created the query, the technical name of the query and web template, who last modified the query, the current user, last update, etc.

**Query Documents** displays any documents that are attached to the query.
Filter Values

A. Variable Filters: This will display the variable values entered when you ran the report.
B. Dynamic Filters: This will display any filtering done on the current tab. Dynamic filters only apply to the tab you are viewing while Variable Filters are the same for all tabs.
C. To hide the display of the Variable and Dynamic filters, click on the icon.

Export to Excel

The Export to Excel button can be used to easily export the data table to Microsoft Excel.
A. Click on the Export to Excel icon button.
B. A new dialog box will open. You can either save the file or open it. (Note: This dialog box will vary depending on the web browser you use.
C. If you Open the file, you may be prompted to allow the file to open – depending on your version of Excel and security settings. Click on Yes button indicating you trust the file.
Create Adobe .pdf Document

A. Click on the Export to .pdf button

B. Make any desired settings changes in the Export Dialog box. You can change from Black and White to color, change orientation (landscape or portrait), change margins, and even add text to the header or footer.

C. Click OK to complete export.

Adobe .pdf Document

After exporting to Adobe .pdf, you will be able to Print or Save the document for future reference. One of the new improvements to .pdf printing is that columns and/or rows headings will repeat for all pages.
Users have the ability to change the properties of many reporting objects by activating the properties pane. Click on the Properties button to open the properties pane. (Click on Properties button again to hide the properties pane).

You can modify Table, Chart, All Data Cells, and Query properties. For example, you may want to display text on every line, regardless if it is repeating.

A. Click on the Properties icon/button on the toolbar
B. Click on the Table tab
C. Check the “Display Repeating Text” checkbox
D. Notice that every row will now display text, even if that text is the same as the row above.

Dropdown Filters and Navigational Menus

Each tab may contain a filter dropdowns with a list of values. For example, if you run the report for multiple funds centers you can simply select a single funds center from the dropdown. After making a filter selection, the screen will refresh to display data for the single filter value. The dropdown titles also contain common functionality.
**Navigation Pane - Swap/Replace Characteristics**

Clicking on this icon will open a menu box to the left of your report display. Use the Navigation Pane to add, remove, or replace characteristics or key figures in rows or columns.

To swap (replace) one characteristic with another one, single-click on the characteristic you want (Funds Center in this example) and drag-and-drop it on top of the characteristic you want to replace.

You can drag from the Navigation Pane to the table, from the table to The Navigation pane, or even move characteristics within the table or navigation pane.

**Navigation Pane - Add Drilldown in Rows**

To Add a Drilldown to rows, click on the desired characteristic to add from the list of Free Characteristics. Drag to the new location until a dark line appears. The line will indicate where the characteristic will be added. Release and wait for the screen to refresh.

The new free characteristic will be added to the rows.

You can also remove characteristics by clicking on the characteristic you want to remove and dragging it to the free characteristic section of the navigation pane.
The Filter Pane provides functionality to filter characteristics and key figures by using a dialog box or utilizing the drag-and-drop functionality.

Clicking on the Filter Pane icon will open a filter window to the left of your report data. Please note that if you have the Navigation Pane displayed, the filter pane will be displayed below it.

1. The Filter Pane will display to the left of the data table with all available characteristics and key figures.
2. To filter on a characteristic (Commitment Item in this example) select Edit from the dropdown box.
3. A new dialog window will open for the characteristic selected.
4. Find the value(s) you want to include or exclude in your filter and select the value(s) by clicking on the block to the left.
5. After making your selections, click on the Add button to move values to the Selections table on the right.
6. After clicking the Add button, the added values will display on the Selections table.
7. When complete, click the OK button to transfer the filter.
8. After clicking the OK button to transfer the filter values, the dropdown will display the filtered value and the report data reflects only the data selected.

9. You can also exclude values by selecting the value and clicking the red square.
10. After clicking the OK button to transfer the filter values, the dropdown will display the filtered value. An “!” before the value indicates the value is excluded from the report.
Instead of using the filter dialog box to select filter values, you can also drag and drop values to include or exclude them from the results.

To filter to a single value, click on the value and drag-and-drop it onto the Filter Pane. The Filter Pane will highlight in teal when you hover over it with the selected value.

Drop on Filter Pane and wait for screen to refresh.

After dropping the value onto the Filter Pane, you will notice the data table will display only the single value and the Filter Dropdown on the Filter Pane will also indicate there is a filter.

Tip: The Filters tab will always display any filter values.

To Exclude a value from the data, click on the value and drag-and-drop it in the grey filter pane section “Drag from table and drop items here to remove/exclude filter value(s)”.

An “!” before the value indicates the value is excluded.

If you find yourself completing any of the above navigation on a regular basis, you can save yourself time by saving the layout as a personal view. See Page 18 for saving a personal view. Note that saving a personal view saves all the tabs of the report in the layout they are in when the view is saved so make sure the entire report is exactly as you want it.
If your data list is very long, you may wish to open the data table in a full window. You will still have the ability to use the BI Context Menu but the other web items will be removed from the full window view. Simply click on the Full Window button to open a new window.

There are several tools that will help maximize the display area and assist with scrolling **while locking the column and row headings.**

A. You can adjust the display area by entering the number of rows and columns to display at one time. Simply enter a number and press Enter on your keyboard. You can set the rows and columns to a display area that best fits your computer’s screen size and resolution.

B. Use the scroll buttons to scroll through the data. Column and row headings will display with each step.

C. You can also use the scroll bar on the right and/or bottom of the screen to scroll through pages.

To Exit a BI report simply click the black X in the upper right hand corner of the Report.
Views

Global Views

Each tab may contain multiple views in a dropdown list. Simply click on the dropdown arrow to display a list of views built on the query. Click on the desired view and wait for the screen to refresh with the new view.

Refer to Appendix A for a description of views for each report and tab.

Manage Saved Views

The Manage Saved Views tab on the Business Intelligence menu will be used for two purposes. It will enable a user to directly access a personal view they have created. These views will appear in the “Favorites” folder (The procedure for creating personal views is explained beginning on page 9).

This tab will also be used to access custom views created for you by the Accounting or Budget Offices. The custom views will appear in the “Portfolio” folder.

On the Manage Saved Views tab, it is important to note:

1. No one will be able to see your personal views except you so feel free to create as many as necessary to meet your financial needs.

2. When saving a personal view, make sure each tab in the report is in the format you like. Saving a view as personal will save the entire report in the format it appears as when you saved it.
Currently the Portfolio folder does not appear by default. Programmers are working on a resolution for this but in the interim, you can navigate to your portfolio by:

1. Click on the Context Menu next to Favorites
2. Select Go To then select Public Folders
3. Click on the Millersville folder to display custom reports assigned to you.

NOTE: This folder is currently empty. The Budget and Accounting Offices will be working with users in the coming months to ensure all custom view are created as needed and that your financial reporting needs are met.
BI Jump Functionality

BI provides users the ability to “jump” into the details which make up amounts displayed on reports. On the summary tab of the Budget Report, a user can drill in to all of the amounts displayed.

Summary amounts will allow the user to “jump” into the detailed transactions. Detailed transactions will allow users to “jump” into the actual documents such as the Funds Reservation, Purchase Order, Journal Entry, Budget Document and Payment Details. Directions for jumping into the details are included below. Because the options for “jumping” vary depending where you are located on the report, a flowchart is included on the next page to help users navigate.

1. To view actual revenue and/or expense document
   a. Right click on the Actuals column and select Goto. (By clicking on the total you will see results for all commitment items displayed. By clicking on an individual commitment item line, you will see only results for that commitment item.)
   b. Because you were on the Actual Amount, you will select Actuals Detail Lines.
   c. A new window will open and display a summary of all of the transactions
   d. You can drill into the accounting document by right clicking on a FI Doc#, select Goto, and select SAP FB03-Display Accounting Document.

2. To view budget documents
   a. Right click in the Current Budget column and select Goto and Budget Detail Lines. You can drill into the budget document by right clicking on Doc#(BCS), select Goto, and select Budget Detail Lines.

3. To view funds reservations, purchase requisitions, or purchase orders
   a. Right click in the Commitments column and select Goto and Commitment Detail Lines. You can drill into the document by right clicking on Doc#, select Goto, and select the SAP transaction applicable to your drill down.

APPENDIX A
QUICK REFERENCE OF BI TOOLBAR ICONS

A. OPEN - Access and open any previously saved user-defined views.
B. SAVE - Save a user-defined View after implementing formatting and criteria changes.
C. UNDO - Undo last navigation change. Each click will back out another step / change. Allow time for each screen refresh. **NOTE: THIS ACTION MAY TAKE SEVERAL MINUTES. VARTAN WAY (SYTEC) CURRENTLY WORKING ON A SOLUTION.**
D. RESET - This will undo all user navigation and filter changes and return the view to the way it was delivered. **NOTE: THIS ACTION MAY TAKE SEVERAL MINUTES. VARTAN WAY (SYTEC) CURRENTLY WORKING ON A SOLUTION.**
E. VARIABLE SCREEN - This will return the user to the Initial Variable Screen to change your selections.
F. DISPLAY - This will show all variable and filter selections that are currently in effect.
G. FILTER VALUES - Hide/Display Variable (report-wide) and Dynamic (tab only) Filter Values. The report defaults to display variable and filter values.
H. EXCEL - This will allow you to export the current view to Excel for further processing.
I. PDF PRINT - This will convert the current view to a pdf format to allow you to either print the view or save the pdf file.
J. PROPERTIES - This will display the properties of the current view. Toggle on / off.
L. NAVIGATION PANDE - This will allow you full access to the building blocks of the current view. Toggle on / off.
M. FILTER PANDE - This will allow you full access to apply / remove filters on the data. Toggle on / off.
N. EXCEPTIONS - Add or edit the formatting of cells based on report values - i.e. cells in red when dollar amount is negative.
O. CONDITIONS - Limit display of data that meets particular user-defined criteria.
P. FULL WINDOW VIEW - Open the report detail or chart in a full window to aid scrolling.
Q. DOCUMENTATION - Access the report documentation and/or tab specific notes.
