Documentation of Physical Disability/Chronic Illness

To provide reasonable and appropriate accommodations, this office requires both current and comprehensive documentation of the student’s disability or disabilities from the diagnosing physician or medical professional.

The report should:

- Describe the diagnosis, student's current symptoms, related symptoms and functional limitations that cause significant impairment in a major life activity.
- Include the student’s medication(s), dosage, frequency, and adverse side effects.
- Explain current treatment including plans to continue treatment or an alternative to treatment.
- Recommend specific accommodations, if warranted, and provide a rationale for each recommendation that is relevant to a higher education setting.
- Be submitted with the official signature of the professional and be typed on the professional's/office letterhead.
