/*Make sure Office 2007 is up to date. Visit the Microsoft Office update site at http://officeupdate.microsoft.com and check for updates.*/

1) Go to Start>settings>Control Panel
2) Double Click on Mail.

3) You should now be at a screen that looks like this. Click on ‘E-mail Accounts’.
4) Make sure that ‘Microsoft Exchange’ is selected and click next.
5) Click manually configure then click next.
6) Choose Internet Email then click next.
7) On this screen fill in ‘Your Name’, ‘E-mail Address’, and ‘User Name’. In the incoming mail servers text field enter ‘webmail.bloomu.edu’. The Outgoing mail server (SMTP) needs to be ‘webmail.bloomu.edu’. It is recommended that you do not store your password for security reasons when using a shared computer. Click on ‘More Settings…’.

![Add New E-mail Account](image-url)

- **Internet E-mail Settings**
  - Your Name:
  - E-mail Address:
- **Server Information**
  - Account Type:
  - Incoming mail server:
  - Outgoing mail server (SMTP):
- **Logon Information**
  - User Name:
  - Password:
  - Remember password
  - Require login using Secure Password Authentication (SPA)

**Test Account Settings**

After filling out the information on this screen, we recommend you test your account by clicking the button below. (Requires network connection)
7) Go to the ‘Outgoing Server’ tab and check ‘my outgoing mail server (smtp) requires authentication’ and ‘use same settings as my incoming mail server’.
8) Go to the ‘Advanced tab’ and select ‘This server requires an encrypted connection (SSL)’ under the Incoming and outgoing server label. Change the ‘Outgoing Server (SMTP)’ port to 587, and verify that the ‘Incoming Server POP3’ port is 995.

The “Delivery” options are optional. If you do not check “Leave a copy of messages on server”, they will **not** be available when you log into Outlook Web Access. It is recommended that you check it. (Note that this will **not** affect Mimosa, messages will be copied there regardless). Click ok then next then finish and finally close.

SEE SPECIAL NOTE!

SPECIAL NOTE:
If you use the POP setting to get your email the default setting is to REMOVE the email messages from the server when they are downloaded into your email client.

If you wish to use your email client in ADDITION to another means (the web, or Outlook on campus) to read your message you MUST place a check in the box next to "leave a copy of the message on the server" when you setup your mail client

If you are ONLY using your email client to get your messages this is not necessary.
10) Open outlook and click ‘send/recv’ to check your mail.
