

Windows Mobile 6 Exchange Setup Instructions

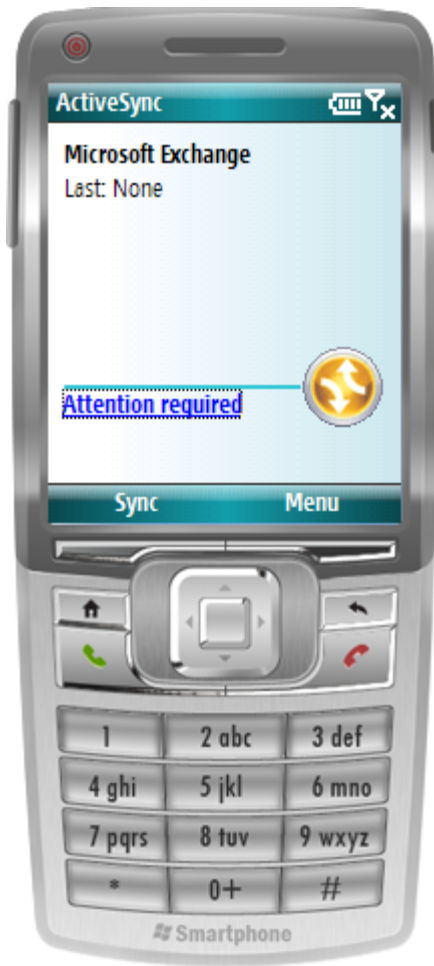

To begin using your phone with your exchange email account, click Start, and then click on the *ActiveSync* icon. On the next screen, click the link that says *set up your device to sync with it.*

You should be on a screen that looks like this. Enter your email address, check the *Attempt to detect settings* box, and click *Next* to continue. On the next screen, enter your username, password, and for the domain, type in *BUAD*. Click *Next* to continue.

On the server settings screen, enter *webmail.bloomu.edu* for the server address, and check the box that says *This server requires an encrypted connection*. Click *Next*. Confirm the options on the following screen, then click *Finish*.

You're done. Now, click on *Sync* to begin using Microsoft Exchange.
