

[Chrome not respecting cookie settings](#)

This may stop you from paying your bill through touchnet. (Other web sites you go to may be affected as well.)

- In Chrome, type in the address bar **chrome://flags/**
- Type “cookies” in the Search flags box
- This should bring you to the following flags
 - SameSite by default cookies
 - Enable removing SameSite=None cookies
 - Cookies without SameSite must be secure

- Disable each of them

- **SameSite by default cookies**

Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android

[#same-site-by-default-cookies](#)

Disabled ▾

- **Enable removing SameSite=None cookies**

Enables UI on chrome://settings/siteData to remove all third-party cookies and site data. – Mac, Windows, Linux, Chrome OS

[#enable-removing-all-third-party-cookies](#)

Disabled ▾

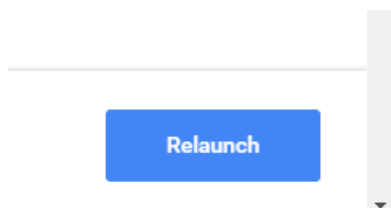

- **Cookies without SameSite must be secure**

If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if “SameSite by default cookies” is also enabled. – Mac, Windows, Linux, Chrome OS, Android

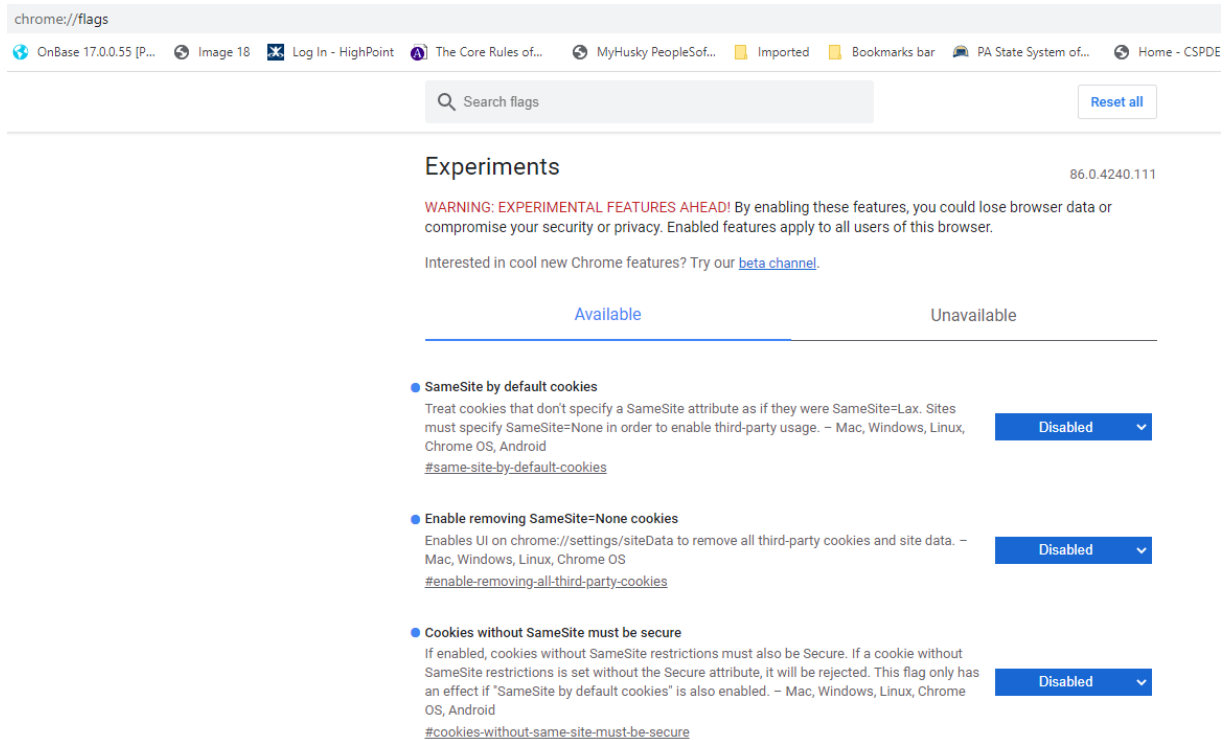

[#cookies-without-same-site-must-be-secure](#)

Disabled ▾

- Make sure you're logged out of everything, then click on the Relaunch button at the bottom.

- Your browser will refresh and show you this

The screenshot shows the Chrome flags page at chrome://flags. The browser's address bar and tabs are visible at the top. The page title is "Experiments" with a version number "86.0.4240.111". A warning message states: "WARNING: EXPERIMENTAL FEATURES AHEAD! By enabling these features, you could lose browser data or compromise your security or privacy. Enabled features apply to all users of this browser." Below the warning, there is a link to the "beta channel". The page is divided into two columns: "Available" and "Unavailable". Three flags are listed under the "Available" column, each with a "Disabled" button and a dropdown arrow:

- SameSite by default cookies**: Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android. [#same-site-by-default-cookies](#)
- Enable removing SameSite=None cookies**: Enables UI on chrome://settings/siteData to remove all third-party cookies and site data. – Mac, Windows, Linux, Chrome OS. [#enable-removing-all-third-party-cookies](#)
- Cookies without SameSite must be secure**: If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if "SameSite by default cookies" is also enabled. – Mac, Windows, Linux, Chrome OS, Android. [#cookies-without-same-site-must-be-secure](#)

- Close Chrome and restart
- Try to pay your bill again. It should go through.
