In promoting a healthy and safe environment for our students, our Care Team (Behavioral Intervention) responds to students who exhibit erratic, disruptive, disturbing and/or troubling behaviors. This could include but not limited to changes in personal appearance, attitude and disposition, health and wellness, mental health, and safety concerns.

The CARE Team convenes when students of concern are referred by members of the university community who either observes, interacts or is made aware of a student who has shown significant changes in behavior and/or attitude, who is having a difficult time adjusting to college life, adapting to the changes they are experiencing, struggling with mental health or stability issues, in distress as a result of a personal crisis, or has made references to harm oneself or attempted to harm themselves. Referrals to the CARE Team are made to the Office of Dean of Students to either Donald W. Young, Assistant Vice President / Dean of Students or Danial Haverstock, Assistant Dean of Student Assistance at (570)389-4734.

The CARE Team reviews all available information regarding the student of concern in a proactive manner to provide students with appropriate intervention and resources in the development of a plan for wellness.
